

Software Testing Engineer

Klagenfurt/Vienna, Austria or Remote • Engineering/Testing • Part Time

Well-capitalized early stage start-up seeks extremely talented Full Stack Engineer to help pioneer the way sales and marketing teams work together. Kickscale builds the leading SaaS platform supporting business development teams in managing, measuring and optimising their campaigns and meetings to deliver predictable sales pipeline.

If you are passionate about testing and improving software we want to talk with you! You will be the key contributor and leader of our SaaS product testing team and drive the day-to-day testing process.

You must have a background in IT and ideally first experience with testing frameworks for API, web and mobile platforms. You should have a BSc (HTL/Uni/FH) or MSc (Uni/FH) in Computer Science or the equivalent working experience. Top-notch communication skills are essential.

Expect talented, motivated, intense, and interesting co-workers.

Your responsibilities:

- Develop and execute overall testing strategies including test plans, test scripts, test automation, test cases and reports for Kickscale's Business Development Platform
- Document and evaluate test results and defects; track and manage defects through to resolution
- Ensure full traceability between test scripts, results, and user requirements
- Author test plans, test cases, and/or test scripts required to validate solutions
- Collaborate with developers to ensure testing results meet performance and scalability requirements
- Conduct troubleshooting, problem triage, and root cause analysis
- Analyze the impact of new solutions/enhancements and run appropriate regression testing
- Participate in the design and definition project phases, to ensure full understanding of client requirements prepared by the project team

Required Qualifications:

- BSc in computer science or a related field (HTL/Uni/FH) and affinity towards IT
- Experience with at least one programming language (Python, C#, JavaScript, ...)
- Experience with similar roles in the area of software testing
- Experience with API and UI testing tools and frameworks
- Outstanding team player with strong communication skills and high quality standards
- Tech-savvy - we are looking for someone who likes to learn and develop tech skills of the latest testing technologies and methodologies

Preferred Qualifications:

- Deep experience in testing Software-as-a-Service platforms and APIs

You'll be joining a young and dynamic team that is passionate about building great software and quickly iterating on ideas and work to provide customers with improved experiences. We challenge each other constantly to improve, always asking difficult questions and pushing personal and professional growth. The development team is focused on building new features and maintaining as well as testing the current SaaS platform.

Kickscale was founded out of a problem a B2B tech start-up had. We had to identify what works best for sales pipeline generation and what activities lead to revenue generation. Based on the approaches we learned at the famous american startup incubator Y Combinator, we contacted more than 1,000 people each week and set up as many virtual and in-person meetings as possible. The implementation and definition of this outstanding process took us over two years. Afterwards, we have recognised that the process works, but we need something to scale, guide and coach new team members and analyse the activities afterwards as well as set-up and organise the meetings generated out of these campaigns more efficiently. We have founded Kickscale to consult and teach the process and offer a SaaS Business Development Platform to solve these challenges to generate predictable sales pipeline and predictable revenue. Our team of experts helps leading companies to help them generate more business, track the outcome of their business development efforts and focus on activities which lead to pipeline generation and revenue growth.

From high growth Start-Up to established businesses.
International Companies use Kickscale to start, run and scale their businesses.

More about our Benefits

Whether you work in an office or a distributed team, Kickscale is highly collaborative and yes, fun! To support you at work (and play) we offer some fantastic benefits: flexible working options, 1 paid volunteer day a year for your favorite cause, an annual allowance to support your learning & growth and unique get togethers.

The World is our playground and **Kickscale is headquartered in Austria 🇦🇹**, with locations in **Vienna**, Austria's capital city and **Klagenfurt**, the Silicon Valley of the Alps.

COVID-19 Information: Kickscale is continuing to hire with all interviewing and on-boarding done virtually due to COVID-19. All new and existing Kickscalers will continue to work from home until it's safe to return to our offices in Vienna and Klagenfurt. When our offices re-open, we will provide the choice to work from home or return to work in an office unless a job requirement makes it necessary for a role to be performed at a Kickscale office.
